

Table of Contents

Scope and Sequence	1
Characteristics of the Elementary Age Child	5
Chapter 1: Introduction to Chemistry	6
Water	6
The Water Cycle	8
Carbon	10
The Carbon Cycle	11
Inorganic Chemistry	13
Organic Chemistry	14
Photosynthesis	15
The Nitrogen Cycle	17
Conclusion	19
Organization of the Chapters	20
Chapter 2: The Scientific Method	21
Purpose of the Scientific Method.	22
The Scientific Method	23
Sample Experiment Sequence	24
Chemistry Materials	27
Safety Equipment	28
Safety Rules	29
Group Discussion	30
Sample Experiments for Each Level.	31
Chapter 3: Basics of Chemistry and Matter	44
Purpose of Studying Chemistry	45
Chemistry & Its Branches	46
Matter	47

Composition of Matter	48
Physical States of Matter	50
Chapter 4: Properties of Matter.	52
Purpose of Studying Properties of Matter	53
Physical Properties of Matter	54
Experiments with Physical Properties.	55
Chemical Properties of Matter	80
Experiments with Chemical Properties	80
Energy and Changes in Matter	85
Chapter 5: States of Matter	86
Purpose of Studying States of Matter	87
Gases	88
Liquids	92
Solids	95
Phase Changes	99
Energy and Phase Changes	100
Plasma	101
Chapter 6: Measurement.	102
Purpose of Studying Measurement	103
Linear Measurement	104
Activities for Linear Measurement	105
Volume Measurement	106
Activities for Volume Measurement.	107
Mass/Weight Measurement	108
Activities for Mass Measurement.	109
Temperature Measurement	110
Activities for Temperature Measurement	111
Experiments with Temperature Measurement	111
Density and Specific Gravity Measurement	116

Activities for Density Measurement	117
Experiment with Density Measurement	117
Chapter 7: Mixtures	121
Purpose of Studying Mixtures	122
Mixtures	123
Experiments with Mixtures	123
Kinds of Mixtures	128
Solutions	129
Types of Solutions	130
Solubility	131
Experiments with Solubility	133
Suspensions	135
Experiments with Suspensions.	135
Colloids	138
Experiments with Solutions, Suspensions, and Colloids	138
Chapter 8: The Elements.	141
Purpose of Studying the Elements	142
Elements	143
Chemical Symbols	144
Atoms	145
Electrons, Protons, and Neutrons	146
The Structure of the Atom.	148
Atomic Number	149
Mass Number	150
Isotopes	151
Atomic Mass or Atomic Weight	152
Electrons and Orbitals	155
Atoms and the Periodic Table	156

Layout of the Periodic Table	168
The Periodic Table	171
Atomic Size	173
Ionization Energy	174
Electron Affinity	175
Atoms and Ions	176
Chapter 9: Compounds	179
Purpose of Studying Compounds	180
Compounds	181
The Octet Rule	182
Atoms and Ions	183
Ionic Bonds and Compounds	184
Covalent Bonds and Molecular Compounds	185
Chemical Formulas	187
Ionic Charges of the Elements	188
Lewis Electron Dot Diagrams	189
Electronegativity	190
Polyatomic Ions	191
Acids and Bases	192
Experiments with Acids and Bases	192
Oxidation Number	195
Chapter 10: Energy	196
Purpose of Studying Energy	197
Energy	198
Kinetic Energy	199
Potential Energy	200
Heat Energy	201
Changes in State	202

Experiment with Changes in State	202
Electromagnetic Energy.	205
Electrical Energy.	207
Nuclear Energy	208
Law of Conservation of Energy.	209
Chapter 11: Chemical Reactions.	210
Purpose of Studying Chemical Reactions	211
Chemical Reactions	212
Writing Chemical Equations	213
Balancing Chemical Equations	214
Combination Reactions	218
Decomposition Reactions	219
Single-Replacement Reactions.	220
Double-Replacement Reactions	222
Combustion Reactions	223
Oxidation-Reduction Reactions	224
Chapter 12: Photosynthesis	225
Purpose of Studying Photosynthesis	226
Photosynthesis	226
The Light Reaction	227
The Dark Reaction	228
The Importance of Photosynthesis	229
Research Topics: Notable People	230
Materials List	231
Recommended Reading	234
Additional Titles	235
